

SanPly-3

**Flexible Wood Veneer
for the Woodworking and OEM Industries**

“SanPly-3” Veneer an Architectural Grade sheet veneer for the woodworking, casegoods, O.E.M. companies and the automotive dashboard industry. The unique process of using 3 layers of real wood veneer, a glue barrier and paper makes “SanPly- 3” the right product for your job.

“SanPly- 3” Veneer sheets offer the following benefits:

- All Architectural Grade faces.
- All sheets are sequenced to each other from the same flitch.
- All sheets are pre-sanded to 280 grit, for saving time in the shop.
- Excellent for profile wrapping, hot pressing or cold pressing.
- All sheets are over sized in both directions for ease of lay-ups.
- Tight bending ability with ¼” end grain and 90 degrees side grain ability.
- Better expansion and contraction factors than other paperbacked veneer sheets.
- Over 60 species of Domestic & Exotic species at our Factory to choose from.
- Flat Cut, Quarter Cut, Rift Cut and Burls are available.
- “**RealTec**” Figured Species and “**FineTec**” Burl Recon and Q.C. Recon Species are offered on “SanPly-3” backer.
