

SanPly-4

FLEXIBLE WOOD VENEER

“SanPly-4” Veneer an Architectural Grade sheet veneer for the woodworking and casegoods industry. The unique patented process of using real wood veneer, paper, foil and paper makes “SanPly-4” multi-ply a true one of a kind sheet veneer.

“SanPly-4” with its foil liner will assure you of no bleed through. The foil liner also assures you of better expansion and contraction control.

“SanPly-4” Veneer sheets offer the following benefits:

- All Architectural Grade Faces.
- All sheets are pre-sanded to 280 grit to save time in the shop.
- All sheets are in sequence, standard.
- All sheets are over sized in both directions for easy lay-ups.
- The only Fire Rated sheet veneer in the industry; Class “A” on Prefinished **SanPly-4** and Class “B” on unfinished **SanPly-4** Veneer sheets.
- Maximum radius ability in the industry with a ¼” end grain bending ability and 90 degrees on a side grain bend.
- Standard sheet sizes are 4’ x 8 and 4’ x 10’. Longer lengths are available on special order.
- Over 60 species of Domestic & Exotic species available from our Factory.
- Flat Cut, Quarter Cut, Rift Cut, Rotary Cut and Burls are available.
- “**RealTec**” Figured species and “**FineTec Burl & FineTec Q.C. Recon**” species are offered with **SanPly-4** multi-ply backer.
