

DATA SHEET

SanPly-3 Veneer is an Architectural Grade real wood sheet veneer developed for woodworking, casegoods, O.E.M. industries. This flexible veneer can conform to tight radii and curved surfaces. The unique process of using 3 layers of real wood veneer, a glue barrier and paper is suitable for the most demanding horizontal and vertical applications.

SanPly-3 Veneers offer the following benefits:

- All Architectural faces.
- Standard sheet sizes are 4' x 8' and 4' x 10".
- All sheets are sequenced to each other from the same flitch.
- All sheets are pre-sanded to 280 grit.
- Excellent for profile wrapping, hot pressing or cold pressing.
- All sheets are over sized in both directions.
- Tight bending ability with 1/4" end grain and 90° side grain ability.
- Better expansion and contraction factors than other paperbacked veneer sheets.
- Over 60 Domestic and Exotic species to choose from.
